

I'm a student doing Classics and English. I'm doing a second undergraduate degree as I loved Maynooth so much. I have experience being an academic rep and Senator. I'm currently Admissions Ambassador for the University. Last year I was President of MU SVP.

Engagement -

Student engagement in the faculty has not been good over the last year or so. I want to work to try and improve student engagement by reaching out to the departments in the faculty to try to establish a line of communication between department staff, students and academic reps and to work to resolve issues.

Encouragement-

I want to encourage students in Arts and Humanities to get more involved in representation and to encourage them to talk to people in their class if they have any issues and that they are there to represent them.

Accountability-

As Faculty Convenor you are accountable to the academic reps and students in the faculty. I will always put the interests of the students in faculty first and I will always be truthful in my answers when questions are put to me.

Learning -

I want to make learning better. I want to raise awareness around the use of ai. Assignments students submitted are being flagged for ai. I want to work to get ai detector available on moodle so students can view it. I want there to be a better understanding of ai.

I also want work to have more blended learning available for students. There are times when students can't make it to campus and the lecture slides and notes are not available on moodle. I want to work to ensure that learning material is available on moodle for students when they miss lectures.

I would appreciate your vote on March 10th and 11th and I will represent you to the best of my ability.
